Project 4 Part 1 QuickHull

Name: Randy Fu   Period: 5   Date: 12/5

Is your lab name l041?(lowercase L followed by digits 041)   Yes

Did you created a class to store a point?   Yes

Did you use a vector to store the points you generated?   Yes

Did you use a vector to store the points that form the convex hull?   No I used a list

Paste here 2 clear picture of the graph that you obtained by running your application 2 times. Each point on this graph should be graphed as a small circle (radius 2 or 3) and the convex hull you obtained should be on the graph too. (if you wish you may use colors)
